Weekly Roundup

WR 44-86

November 5, 1986

The Foreign Agricultural Service of the U.S. Department of Agriculture today reported the following developments in world agriculture and trade.

GRAIN AND FEED

CHINA Buys U.S. Corn for the First Time in Three Years. In an apparent response to the continued efforts of the U.S. Feed Grains Council, China has purchased 30,000 tons of industrial—use corn which may signal improving prospects for U.S. corn sales to China. In recent years, China has imported only small amounts of corn from Thailand and South Africa while exporting 5 to 6 million tons to several important U.S. markets in Asia. The Council has been working to expand China's corn use for industrial and feed purposes which will likely increase the demand for imported corn and divert Chinese corn from the export market. Sharply lower U.S. corn prices should further improve U.S. market opportunities in China.

DAIRY, LIVESTOCK AND POULTRY

POLAND'S Milk Production Falls. Poland's 1986 milk output is expected to be 15.7 million tons, 5 percent below 1985 and 6 percent below the 1984 record. Milk cows are down 6 percent. Feed supplies for the year have been good and supplies for the coming winter are described as more than adequate; however, low profitability during the past two years caused many farmers to lose interest in dairying. To stop the decline in milk production, the Polish government announced a 17-percent price increase effective July 1986; the impact of the increase, however, will not be noticeable for at least a year.

#### COTTON AND FIBERS

U.S. Cotton Exports Up Sharply. U.S. cotton exports increased sharply during September, reaching 374,000 bales, the largest September figure since 1980. Exports during September 1985 were 200,000 bales. Exports during the first two months of the 1986/87 crop year totaled 660,000 bales. Japan, South Korea, the EC, Taiwan and Indonesia are the leading destinations for U.S. cotton this season.

#### \*\*\*\*

TAIWAN Imports Record Amounts of Cotton. Taiwan reports record cotton imports of 1.5 million bales during 1985/86, mainly due to lower cotton prices and good demand for its textile exports. U.S. cotton exports to Taiwan dropped in 1985/86 but are expected to rebound sharply during 1986/87. U.S. export commitments to Taiwan totaled 826,000 bales as of mid-October. U.S. exports to Taiwan totaled only 46,000 bales last season. Principal suppliers in 1985/86 were Pakistan with 568,000 bales, Australia 142,000 bales, Brazil 137,000 bales, Cote d'Ivoire 110,000 bales, and Burkina Faso 95,000 bales.

#### TOBACCO

TURKEY Announces Tobacco Export Prices. In Turkey, the government has announced the minimum export prices for unmanufactured Oriental tobacco during the 1986/87 marketing season. Export prices for the 1984 and 1985 crops will remain at last year's levels while prices for the lower quality grades of the 1983 crop were reduced 10-20 cents per kilogram. Prices in U.S. dollars per kilogram for American-grade qualities for the three crop years will be: Aegean, \$4.40; Marmara, \$4.50; Black Sea (Bafra), \$4.60; and Black Sea (Samsun), \$4.70. The retention of export prices at last year's levels is apparently an attempt to keep Turkish prices competitive with other Oriental tobacco exporters. During 1985, U.S. imports from Turkey totaled 51,931 tons, or approximately 50 percent of Turkey's annual export volume.

#### \*\*\*\*

ZIMBABWE Market Bottoms Out at Closing. After 25 weeks of selling, the Zimbabwe flue-cured auction sales were completed, having marketed 114,304 tons of tobacco at an average price of Z\$3.13 per kilogram (US\$1.85). This compares with 105,556 metric tons sold last season, at an average price of Z\$2.68 per kilogram (US\$1.56). A record average price of US\$2.17 per kilogram was registered in the 21st week (early September). However, this trend was short lived; prices started plummeting in mid-September and ended with an average price of US\$1.14 per kilogram (25th week).

Part of the price drop is attributed to lower quality and badly handled tobacco on offer and, in part, to declining grade prices. The U.S. flue-cured markets are experiencing similar price drops, with an increasing amount of sales going to stabilization. The decline in grade prices is due to lack of demand, and may be an indication that world supply is running ahead of demand.

#### FRUITS

COLOMBIA Ends Ban on Wine Imports. Colombia has rescinded its import prohibition against U.S. wines. Low-alcohol wines (less than 10 percent alcohol) such as wine coolers, remain prohibited.

#### CREDIT NOTES

GSM-102 Actions Announced for YUGOSLAVIA and YEMEN. USDA authorized an additional \$73.5 million in credit guarantees for Yugoslavia and \$28 million in guarantees for Yemen.
